

DICE RING SIZING GUIDE

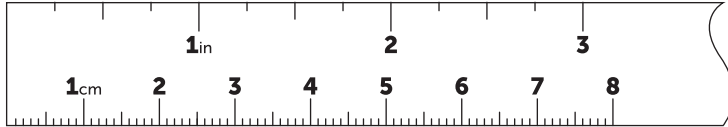

The best way to get your size will always be to visit a jewelry store in person. This sizing guide is second to that.

PRINT and CALIBRATE

When you print this PDF file, use the **ACTUAL SIZE** or **100% SCALE** settings. The coin on the right should match up exactly to a US Quarter. You may also use a ruler to check your scale below.

US QUARTER

TOP RING LOCATION

For the easiest access during game play.

METHOD 1: Finger Sizing Tool

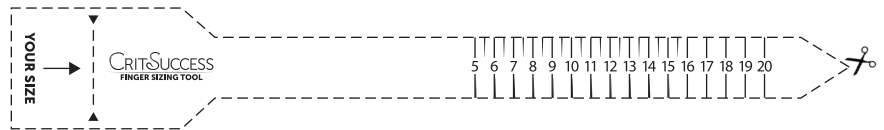

STEP 1: Cut out the Finger Sizing Tool to the right.

STEP 2: Cut the slit next to the "Your Size" arrow.

STEP 3: Slide the pointed end through the slit.

STEP 4: Pull the tool snug around your finger.

STEP 5: Note the size. Round up if between lines. Add 1/2 Size for triple band rings.

METHOD 2: Measure One of Your Rings

Place one of your current rings over the circles. Find a circle that matches the **TIGHTEST** part of your ring.

Remember to add 1/2 a size for triple band rings.
